

All-in-One Solution #3: Snazzi* III AV.DV

Manufactured by Singapore-based V ONE Multimedia, the Snazzi series of digital video solutions has garnered some praise from both local and international retailers. Their range include the Snazzi* Video CD Creator (S\$246), Digital Video Link (a FireWire PCI card, S\$205 for notebooks, S\$153 for PC), Snazzi*I (S\$348) and Snazzi*III (S\$565).

The latest Snazzi product from V ONE is the Snazzi*III AV.DV (S\$699), which unlike the original Snazzi*III, now comes with two additional FireWire ports on the PCI adapter card (on top of the Video-in and Video-out, S-Video in and audio-in jacks). This makes the card one of the most versatile there is today, having both AV and DV connectors (plus an S-Video in connector). Available in the DVD and Gold Editions, the latter uses Ulead's VideoStudio 5.0 as the video-editing software of choice, while Gold takes on PowerDirector, which comes with Smart Video Rendering Technology (SVRT), and allows you to trim your videos frame-by-frame.

How Does It Help You Tell Your Story Better?

Though we weren't able to procure the Snazzi*III AV.DV in time, we were able to see quite a number of inherent conveniences that the Snazzi*III AV.DV brings to you. Besides the sub-S\$1000 price point and wide-ranging suite of software, the Snazzi*III AV.DV comes with Sonic's MyDVD, allowing you to capture video and audio clips to your hard drive and then transcode them on burners from Pioneer, HP, Ricoh, Philips, Sony to Panasonic. It also comes with the nifty LMSoft Presenter Studio SE, where you can create basic multimedia presentations running on templates for MPEG-1, MPEG-2 and MP3s.

You can contact V ONE Multimedia at 6391-3088 for additional information.
